

RACHEL GAPASIN

Front-end Developer

Jersey City, NJ | +1 (646) 481-5216 | rachelgapasinn@gmail.com
[linkedin.com/in/rachelgapasin](https://www.linkedin.com/in/rachelgapasin) | rachelgapasin.netlify.app | github.com/rachelgapasin

SUMMARY

Current student looking to join the workforce to gain real-world experience in the tech industry, particularly in front-end web development. Highly organized, detailed-oriented, and quick to adapt to new tasks and environments. Dependable and reliable, ready to learn and grow with your company.

EDUCATION

B.S., Computer Science - New Jersey City University

Expected Graduation May 2024

Presidential Scholarship, GPA 4.0

- **Coursework:** Visual Programming, Software Engineering, Data Base Design, Artificial Intelligence
- **Involvement:** Software Development Club, Girls Who Code Club

TECHNICAL SKILLS

Languages: HTML, CSS, React, JavaScript, SQL, Java, Python

Tools: Git, GitHub, Figma, Visual Studio Code, Bootstrap, Moment.js, APIs

EXPERIENCE

Girls Who Code Leadership Academy - Fellow

Aug 2023 - Present

- Demonstrate leadership and technical skills through the completion of a Give Back Project that spreads awareness about homelessness and provides resources in New Jersey.

New Jersey City University - Computer Science Summer Research Intern

May 2023 - July 2023

- Collaborated with team members to develop and fine-tune reinforcement learning algorithms using Python to ensure efficient training and deployment on AWS DeepRacer.
- Independently conducted data analysis and model evaluation, resulting in targeted model optimizations.
- Skillfully conveyed our team's research findings and breakthroughs to both technical and non-technical audiences through engaging presentations at a research symposium.

PROJECTS

Dictionary App

Deployed site: wordist.netlify.app

GitHub Repository: github.com/rachelgapasin/dictionary

- Description: a dictionary app built in React, displays definitions, phonetics, and related images
- Technologies: React, CSS, Bootstrap, dictionary API, images API

React Weather App

Deployed site: weather-or-not.netlify.app

GitHub Repository: github.com/rachelgapasin/react-weather-app

- Description: a weather app built in React, updates the current weather and forecast for the week
- Technologies: React, CSS, Bootstrap, SheCodes Weather API/OpenWeatherMap API
